CARRIER OBJECTIVE

Execution-oriented Full Stack Developer and AI Builder with a hands-on approach to building modern, user-centric web applications and tools. Experienced in engineering responsive user interfaces with React.js, developing browser extensions, and integrating AI workflows. Highly adept at moving rapidly from concept to functional code, prioritizing responsive design, clean API implementation, and practical problem-solving.

EDUCATION

- Mount Zion College of Engineering and Technology, Pudukkottai, Tamil Nadu, India. B.E - Electronics and Communication Engineering (2022- Present) CGPA : 7.8
- Lions matriculation Higher Secondary School, Ponnamaravathy, Pudukkottai, Tamil Nadu, India. HSLC-73%(2021-2022)
- Lions matriculation Higher Secondary School, Ponnamaravathy, Pudukkottai, Tamil Nadu, India. SSLC-84%(2019-2022)

TECHNICAL SKILLS

Software/Tools: Antigravity, GitHub, Git, Microsoft Office, Canva, Figma, VSC.

Programming Languages: Java, HTML, CSS, OOPS concept, Javascript, React.js, API, Router.

Core Skill: Chrome Extension Development, Website Analysis, Web Design, Problem Solving, Logical Thinking.

PROJECTS

1. AI-Futuristic Nova Chat

- Built a sleek, futuristic AI chat interface focused on cutting-edge UI implementation and robust API integration.
- Engineered fluid frontend interaction flows, handling async API responses seamlessly while maintaining real-time UI updates.
- Optimized user experience and layout responsiveness across varying screen sizes to elevate AI-based user interaction.

2. SiteScope-AI (Chrome Extension)

- Developed an AI-powered Chrome extension designed for automated website analysis and rapid feature comparison.
- Implemented core background scripts and browser extension logic to parse web page structures, improving digital research workflows.
- Designed a lightweight, intuitive popup interface ensuring high utility and low resource overhead.

3. Productivity Tracker Chrome Extension

- Engineered a browser extension to monitor productivity metrics, track task duration, and store user analytics locally.

4. Banking System Console Application

- Designed and compiled a secure, terminal-based banking application to handle multi-user authentication, transactions, and ledger management using core OOP principles.

EXPERIENCE(INTERNSHIP)

- A current intern working as a **full-Stack web developer at Visval Carrier Solution in Chennai. (6 month).**
- A cureent intern working as a **React.js developer at Codtech It Solutions Pvt.Ltd in Hyderabad.(online)(1month).**
- Has Successfully completed the PLACEMENT TRAINING organized by our College Management in the topic of **JAVA PROGRAMMING for (15 DAYS).**
- Has attended the internship for **1 month at SIGMA 4 SOLUTION at Karaikudi related to FULL STACK WEB DEVELOPMENT & FIGMA.**

CERTIFICATES

- I passed the Infosys Springboard assessment after completing the Full-Stack Web Development course.
- Java: Qualified in Java Programming for sophisticated application development and coding.
- MongoDB: Qualified in MongoDB for designing, querying, and optimising databases.
- Embedded Systems & IoT Design: Qualified in both fields for creative, real-time solutions.
- MATLAB: Qualified to develop algorithms and perform numerical computations using MATLAB.

ACHIEVEMENTS

- Have presented our team idea and got 2nd prize in Mother Terasa College of engineering and technology, Iluppur.
- Have attended 24 hour's workshop .CIRCUIT WIZARD in Mount Zion College of engineering and technology, Pudukkottai.
- Have attended 24 hours' workshop IOT AND BEYOND: BUILDING SMART EMBEDDED SOFTWARE in Mount Zion College of engineering and technology, Pudukkottai.
